## **Configure TSC Printer by Web Browser**

If your printer includes a built-in integrated Ethernet interface, you may explore and configure the printer's settings and status or update the firmware with your web browser. This feature provides a user friendly setup interface and the capability to mange the printer remotely over a network.

## Open the web view of your printer.

- 1. Open your web browser. (We recommend Internet Explorer or Firefox)
- 2. Type your printer's IP address in the address text-box. And press "Enter".

## Note: This utility works with printer firmware V6.61 and later versions

3. The print server page opens as below.

## Address text-box

- 4. Print server configuration:
  - \* Explore the printer settings.
  - \* Change the printer settings.
