REMOTE PRINTER MANAGEMENT

YOUR BARCODE LABEL PRINTING EXPERTS

SOTI

Business–Critical Auto Identification Printing Meets Business–Critical Printer Management

"Things of the Internet" are getting smarter and more connected. To keep up with ever–increasing customer demands, Enterprises are relying on industrial and mobile printers to improve their operational efficiency, safety and customer experience. However, unexpected maintenance costs and downtime of printers can turn it from a revenue driver into a cost problem. SOTI's IoT management solution is built for the enterprise and provides complete lifecycle management of heavy duty industrial, desktop and mobile printers within an organization, lowering the total cost of ownership (TCO) of their labeling operations and improving the return on investment (ROI) of their IoT initiatives.

Printer Management Made Easy

SOTI Connect provides complete lifecycle management of TSC Printronix Auto ID desktop, industrial, and RFID printer models. Its highly flexible, data-driven architecture means new printers are quickly supported and managed, reducing deployment time for IoT initiatives. SOTI Connect delivers on what matters: increased reliability of an organization's printer fleet and the quality of the materials being printed.

- Set up and configure fleets of TSC and Printronix Auto ID printers and make it easy to support post-deployment with little effort.
- Apply maintenance or full version releases with remote firmware updates that fix bugs, patch vulnerabilities, or enable brand new capabilities instantly.
- Set up alerts to monitor for printer behaviour and receive automatic notifications when behavior is outside of normal configurations.

Manage all printer types, shapes and sizes

Easy integration and maintenance for enterprise applications is a hallmark of TSC Printonix Auto ID, especially the Printronix Auto ID line of printers. Powered by the Printronix System Architecture (PSA), all Printonix Auto ID printers are built on an intelligent design platform with a common user interface, embedded webpage, and an array of printer language emulations.

This makes it easy to integrate Printronix Auto ID into SOTI Connect and existing applications. Once a customer is familiar with one Printronix Auto ID printer, they can easily work with any Printronix Auto ID printer.

- User-friendly interface, charts, and dashboards provide real-time views of printer information and health.
- Reduce maintenance, repair, and resource costs by remotely adjusting printer settings and instantly performing device actions on a single or a group of printers.
- Utilize automation rules to remedy issues by setting pre-defined conditions and preconfigured actions when those conditions are met.

What SOTI Connect Can Do For Your Business

Manage your business–critical industrial, desktop and mobile printers

SOTI Connect addresses key printer management challenges with remote support features that reduce device downtime and workflow disruptions.

- Remote firmware updates enable instant installation of firmware updates.
- Remote printer configurations and settings adjustments ensure print consistency and quality across a fleet of printers.
- Remote support features provide access to printer endpoints and allow organizations to perform actions to troubleshoot and remediate issues.
- Automation rules automatically issue alerts and actions when pre-defined conditions are met.
- Advanced data collection provides around the clock analysis of valuable printer status information to ensure printers perform reliably.

TSC Printronix Auto ID Printers Managed by SOTI Connect

Printronix Auto ID Printers	TSC Printers
T800/T800 RFID Series – Enterprise-grade Desktop Printers	**Alpha-30L and Alpha-40L Performance Mobile Printers**
T4000/T4000 RFID Series – Enterprise-grade Compact Industrial Printers	**TX Series Performance Desktop Printers**
T6000e/T6000e RFID Series – Enterprise-grade Mid-Level Industrial Printers	**MH Series Performance Industrial Printers**
T8000 Series – Enterprise-grade Industrial Printers	**MX Series Performance Industrial Printers**
T6000e ODV-2D/ T8000 ODV-2D – Integrated Barcode Inspection Printers	**PEX Series Performance Print Engine**

SOTI ONE Simplifies Your Business Mobility and IoT

The SOTI ONE Platform is an integrated suite of solutions designed to reduce the cost, complexity and downtime related to business-critical mobility and IoT. Comprised of seven revolutionary products, the SOTI ONE Platform helps businesses remove functional silos, eliminate downtime, build apps faster, manage all mobile and IoT devices in one place and deliver actionable insights. When everything is connected, the SOTI ONE Platform makes mobile and IoT business operations simpler, smarter and more reliable.

SOTI is the world's most trusted provider of mobile and IoT management solutions, with more than 17,000 enterprise customers and millions of devices managed worldwide.

SOTI's innovative portfolio of solution and services provide the tools organizations need to truly mobilize their operations and optimize their mobility investments. SOTI extends secure mobility management to provide an integrated solution to manage and secure all mobile devices and connected peripherals in an organization. To learn more, visit www.soti.net
